Terry Murphy,  
President & CEO

HB 333 creates the Delaware Artificial Intelligence (AI) Commission. AI has the potential to impact all areas of health care from workforce to diagnostics and treatment. With this in mind, it is important for any regulatory entity overseeing AI to ensure continued health care innovation, while providing reasonable guardrails to ensure patient safety and improved outcomes for all patients.

*Beebe Healthcare*

Given the unique opportunities and challenges of AI on the health care front, we appreciate your willingness to consider our recommendation to include a representative from the health care sector as part of the new commission.
