DHA supports SB 194 as ensuring access to care is one of our top three 2024 advocacy priorities. Your bill allows pharmacists, under protocol approved by the Division of Public Health, to provide HIV pre-exposure and post-exposure prophylaxis treatments. Pre-exposure prophylaxis (or PrEP) is medicine taken to prevent contracting HIV. PEP (post-exposure prophylaxis) means taking medicine to prevent HIV after a possible exposure. Allowing pharmacists to provide PrEP and PEP will help increase access to these treatments and thus help reduce the spread of HIV.
